IMPORTANT STUFF:

This app was developed by a dermatologist.

A study published by the British Journal of Dermatology showed blue and red light treatments eliminated p-acne bacteria (a major cause of acne) and reduces skin blemishes by 76%. Studies showed that light treatments were almost twice as effective as benzoyl peroxide, the main ingredient in Proactiv and other common over-the-counter blemish treatments.

INSTRUCTIONS:

Begin by choosing a light from the tab bar below.
Blue & Red alternating light is the recommended option.

Rest the iPhone against your skin's acne-prone areas for 2 minutes daily to improve skin health without prescription drugs.

Blue Light: fights bacteria.
Red Light: helps heal skin.
